

# Adair County News

VOLUME XXI

COLUMBIA, KENTUCKY, WEDNESDAY, AUGUST 28, 1918.

NUMBER 44

## Personals.

Mrs. L. B. Hurt is visiting relatives in Lebanon.

Mr. A. L. Gibson, Harrodsburg, was here a few days since.

Mr. and Mrs. Curt Bell, of Red Lick, were here last Saturday.

Mr. and Mrs. C. S. Harris returned from Mississippi last Friday.

Judge W. W. Jones made a business trip to Jamestown Friday.

Mr. C. M. Barnett, Mt. Vernon, Ill., is with his family here this week.

Mr. Paul Foster, of Greensburg, was here the latter part of last week.

Mr. W. I. Ingram returned from the Louisville market last Friday.

Mr. Frank Tolliver, Lebanon, Tenn., was here a day or two of last week.

Messrs J. C. and M. C. Stephenson of Rowena, attended the chautauqua.

Mrs. L. J. Rosenfield, of Louisville, is visiting at the Rosenfield home, this city.

Mr. Jo Rosenfield, who is engaged at Middlesboro, reached home Monday night.

Mr. Fred Hill made a business trip to Louisville and other points last week.

Mrs. A. H. Lang, of Louisville, is visiting her sister, Mrs. W. F. Cartwright.

Mr. W. G. McComas, Lexington, an underwriter, was here a day or two of last week.

Miss Mollie Caldwell spent last week in the Milltown and Portland communities.

Mr. N. T. Mercer is attending a meeting of Kentucky Postmasters in Louisville.

Mr. and Mrs. G. W. Lowe visited in Harrodsburg, Louisville and other points last week.

Mr. F. M. Gabbert and Attorney Abel Harding, of Harrodsburg, were here a few days ago.

Claud Willis, son of Mr. and Mrs. O. P. Willis, who is employed at Dayton, is at home, on a visit.

Mrs. J. R. Fertine, Little Rock, Ark., who visited Mrs. R. R. Moss, has returned to her home.

Mrs. T. G. Sanford, who visited her aunt, Mrs. Fetta Eubank, has returned to her home, Tampa, Fla.

Dr. J. I. McClendon and wife, of Greensboro, were here last week and attended the chautauqua.

Mr. C. L. Hurt assistant cashier of First National Bank, Burnside, was in Columbia last Saturday.

Mr. G. W. Staples came home, from Lexington, and spent the latter part of last week with his wife and son.

Mr. S. A. Russell, Jr., of Lebanon, an insurance agent, was soliciting business in Columbia last Thursday.

Mrs. Fannie McGarvey and Miss Mattie Taylor, who spent the summer here, left Monday for Middlesboro.

Mrs. Zora Rowe and her son Kinnaid, who are spending their vacation at Red Lick, came up to the chautauqua.

Mrs. J. P. Scruggs arrived last Wednesday from Louisville and will spend several weeks with her sister, Miss Jennie Garnett.

Mr. Barksdale Hamlett went to Louisville Saturday, to see a brother, who is in Camp Taylor, and who is soon to leave for France.

Mr. W. R. Todd, who is engaged in business at Coshton, Ohio, was at the home of his parents, here, a few days of last week.

Mr. Walter Goff and his two runners and a trotter are at the Somerset Fair this week. Mr. L. N. Pickett accompanied Mr. Goff.

Mrs. Leslie Allen, of Bessemer, Ala., arrived last week, on a visit. Her mother-in-law, Mrs. S. E. Allen, met her in Harrodsburg.

Mrs. James Menzies and her children, who have been visiting relatives at Red Lick, Metcalfe county, will return home in a few days.

Miss Prudence Lyon, of Harrodsburg, and Miss Thelma Kelly, her visitor, spent a few days in the vicinity of Columbia last week.

Mr. A. V. Taylor, wife and daughter, Miss Mabel, of Greenwood, Ind., who visited relatives in Adair, left for their home yesterday morning.

Messrs. Geo. Montgomery and Henry Conover, who have been in the service of the government at Syracuse, New York, returned home last Thursday.

Mr. Reed Shelton has accepted a Chair in the University of Illinois for this year. He and his wife, who visited here last for that point last week.

Prof. and Mrs. R. R. Moss and their little daughter, Maxine, and Mrs. Moss' mother, Mrs. J. M. Campbell, spent a few days at Pellyton last week.

Miss Mary Bradley, of Georgetown, was here last Saturday, to secure a teacher for the Sadyville High School. She is the Superintendent of Scott county.

Mr. F. H. Durham and family have returned from a tour through the Blue grass section. They visited Lexington, Versailles, Frankfort and Harrodsburg.

Miss Mary Chandler, who spent several days with Miss Katie Murrell, attending the chautauqua, left the first of this week for her home in Harrodsburg.

Mr. V. Sullivan, who is in the insurance business, was here last week, on a collecting tour and soliciting new members. He represents an industrial company.

Mr. John H. Vier, wife and two daughters, of Terre Haute, Ind., who visited relatives in Adair, have returned to their home. Mr. Vier is a native of this county.

Mr. and Mrs. S. J. McKenney, of Fancy Prairie, Ill., are visiting at the home of H. B. and W. I. Ingram, this place, Mrs. McKenney being a niece of Mr. and Mrs. H. B. Ingram.

Miss Mollie Jeffries left for Vaughn, New Mexico, last Saturday morning. Her sister, Mrs. W. E. Jeffries, who lives in that place, has been quite sick for some days. It is hoped that she will be better when her sister arrives.

Miss Madge Rosenfield, who visited in Louisville, returned home a few days ago. Her sister-in-law, Mrs. Jo Morris Rosenfield, of Petersburg, Va., met her in Louisville and came on to Columbia where she will visit several weeks.

Miss Frances Garnett will leave next week for New Hampshire, where she will spend a month at a summer camp, after which she will go to Cambridge to resume her studies at the Sargeant School of Physical Culture. —Louisville Times

Mrs. R. D. Judd, of South Bend, Ind., who has been visiting at the home of her father-in-law, Mrs. J. H. Judd, left Saturday morning for her home. Her husband has been on the waters for two weeks, and, perhaps, has landed in France.

Misses Kate Gill, Dora Eubank and Mary Lucy Lowe will leave next Saturday, to begin their school work. Miss Gill goes to Smith's Grove, Miss Eubank to Sadyville, Scott county, and Miss Lowe to Auburn, Logan county. They are all excellent young ladies and teachers of experience.

Dr. B. T. Wood and his nephew, Buford Wood Browning, of Danville, visited Dr. Wood's niece, Miss Jennie Garnett, last week. About thirty years ago Dr. Wood was a prominent physician of this place, and he delights to visit Columbia occasionally and shake hands with friends he made in his early manhood.

## Fertilizer.

My brands are all in. Call at the Stephenson Garage. First come first served. Monday, Wednesday and Saturday. 44-2t A. B. Corbin.

The tax-books are now in my hands and I am ready to receive taxes. I or one of my deputies will be at my office daily. Tax-payers are requested to call as rapidly as possible. Cortez Sanders, Sheriff. 43-tf

Velmer Aaron, who is fighting in France, writes his parents, who live here, that he has received two slight wounds; that he is in the hospital, but that he will be ready to be on the firing line again in a few weeks.

I have received some new fall hats, and anyone wanting a hat for the State Fair call at once before they are picked over.

Miss Julia Eubank.

Rev. R. V. Bennett preached for Rev. B. T. Watson at the Presbyterian church last Sunday forenoon and evening. A large congregation was out at the forenoon services.

Only twenty-eight young men registered here last Saturday. A few of these were colored boys.

The Lindsey-Wilson and the Graded and High School will open next Monday.

## A Surprise Marriage.

Last Tuesday afternoon Miss Okey Epperson, one of Adair county's best and popular young ladies, and Mr. Paul H. Waggoner, an excellent young man, possessing fine business qualifications, were happily married at the home of the bride, near Roy Rev. O. P. Bush, of the Baptist Church, was the officiating clergyman. A large circle of relatives and friends were present, to extend the hand of congratulations.

The groom was born and reared in Adair county and is well connected, being a son of the late E. P. Waggoner. He has been engaged in the calendar business for some years, making his headquarters at Louisville. The bride is a charming and popular young lady, and a member of one of Adair's best families.

While the groom has been about Columbia a great deal in recent months, he communicated to very few his contemplated marriage, hence his approaching union with Miss Epperson, now his bride, was kept almost a profound secret.

The couple are now in Louisville, having left for that city a short time after the ceremony was pronounced. They carried with them the very best wishes of a large number of relatives and friends.

## Killing Near Camp Knox.

Monday afternoon of last week a colored man named Anderson shot and killed June Groves, also colored, at Cedar Top School-house, near Camp Knox, Green county. Our informant states that the two men had quarreled before, over the employment of a school teacher. The day of the killing the two men met, Anderson having a doubled barreled shot gun. He said to Groves "you have insulted me," and at the same time making ready with his gun. Groves was unarmed, and he threw up his hands, saying, "don't shoot me." Notwithstanding the plea for his life, Anderson fired, killing him instantly. The murderer was arrested, carried to Greensburg and lodged in jail.

This is the second killing in that neighborhood in the last month, all the parties being colored.

## Birthday Celebration.

In the afternoon of August 15, Willie, the twelve year old daughter of Mr. and Mrs. Finis Rosenbaum, was duly celebrated. Invitations were extended to quite a number of young Misses and the following put in their appearance:

Marguerite and Pearl Bennett, Nell Smith, Julia Phelps, Margaret Patterson, Marshall Paul, Louise Rowe, Mary Summers.

The occasion was a very happy affair, and will long be remembered. Refreshments were served and games played.

Miss Willie was the recipient of many nice presents.

## From Pine Bluff, Ark.

Editor News:—As I don't know whether or not any of our colored boys have written to the Adair County News or not, to let our many friends know how we are getting along in school or in camp, I thought I would write. We have taken automobile and forgoing for our study. We are doing our best to make good; whether in camps of U. S., or in France. We get plenty to eat and a good place to sleep. Fearing this may go to the waste basket, I will write no more this time. Celsier C. Willis, Training Detachment, Branch Normal School.

## For Sale.

Ohio River Salt, 7 bushel barrels, \$4.85 per barrel. 37-tf. young & Hutchison.

Work on the Jamestown road was discontinued for the present last week. The County Judge informs us that there are matters to be adjusted, and that he is waiting for the State Road man, who will probably be here when this paper goes to press. The Judge wants to be just to both State and county, and the people who are mostly interested are requested to hold their condemnations and wait for developments.

On account of the war it is not expected that as many young men as usual will be in school here this year, but there will probably be more young ladies and girls.

## Left for Camp Taylor.

The court auditorium was crowded last Sunday afternoon with friends of the young men who have been called to the colors, and who were present, to answer to the roll call. Thirty six is the number sent from this county, one of whom met the crowd at Harrodsburg.

After the boys had been enrolled Judge Rollin Hurt addressed them, making a splendid speech, which certainly gave the young men great encouragement.

The following is the list of names who left here Monday morning.

James V. Aaron, Elliott N. Lewis, Lee A. Humphress, Lawrence Roy, Willie Grant, Russell Leach, Marvin C. Craven, Benj. F. McFarland, Oile W. Hill, Jeff Smith, John C. Hutchison, Fred L. Farris, Lys Young, Arvin Smith, Robt. Bruce White, Ben Smith, John D. Woodridge, Clai Tarter, Robt. J. Pike, H. Mark Holladay, Arthur A. Holladay, Frank Dohoney, A. Dudley Sparks, Virgil Collins, Ray Caldwell, Geo. C. Garrison, Willie E. Biggs, Lilburn Sullivan, John O. Brockman, James Riley Burton, Sam L. Curry, Finley Littrell, James A. Fudge, Wm. L. Compton, Wm. E. Squires.

## Died on Green River.

Late last Friday afternoon Mr. Owen Beard, 29 years old, one of Adair county's best citizens, died at his home, near Neatsburg. His death brought sorrow to the community in which he lived and his devoted wife is almost heart broken. He left no children. He was a brother of Mr. Wallace Beard, who is in the revenue service, and who reached the bedside just before death came. The funeral and burial was at Tabernacle and it was largely attended.

## Very Much Needed.

If the people of Columbia and vicinity want to do something that would fill a long needed want, an enterprise that is almost indispensable in the summer months, let them organize a company and establish an ice factory. If fifty men would go into an organization, each taking stock to the amount of fifty dollars, the sum of \$2,500 could be raised, sufficient to put up a first class plant, and we believe the stock would pay. All points in the county could be supplied with ice, and besides the market for the product would be here, for Russell, Green, and Metcalfe counties.

## The Radcliffe Chautauqua.

The Radcliffe Chautauqua entertained three days and nights here last week. The lecturers and music were first-class and our people were well pleased with the entire program.

Wholesome advice and a great deal of information were left by the speakers, and the music was scientific and thrilling. A program like the one rendered does a community a great deal of good and our people are loud in their praise of the Radcliffe Chautauqua.

## Left for Camp Taylor.

The following colored men were sworn into the service of the United States last Wednesday afternoon and on Thursday morning left for Camp Taylor.

Lucian Hughes, Lester Hughes, Bob Smith, Pleas Huston White, Lucian Allen, Dennis E. Cheatham, Phillip Vaughan, Velva Vaughan, Joseph H. Waggoner, Chat Smith, Ceola Bledsoe Miller, Marion Jones.

Before taking their departure they were addressed by Rev. Dickerson, the pastor of the colored Methodist Church, who gave them encouraging words and sound advice.

We learn from Mr. J. T. Goodman, of Rowena, who was here Thursday, that last Sunday week at a Baptist church in Wayne county, just over the Russell line, while a storm was raging lightning killed three horses, knocked down twelve others. Notwithstanding there was a large crowd assembled not a person was hurt. Quite a number were slightly shocked. He also stated that corn and other crops on Cumberland river were looking fine. Upland corn he said was needing rain, but it was looking fairly well.

The Lindsey-Wilson and the Graded and High School will open next Monday, September 2. We learn from Rev. Bennett, principal of the Lindsey-Wilson, that the outlook is good for the opening. There is at no time a lack for pupils at the public school.

## Seriously Hurt.

Harrodsburg, Ky., Aug. 22.—Robert Lyon, of the wholesale and retail firm of Buchanan & Lyon, of Harrodsburg, Ky., was seriously injured about the head and the automobile which he was driving was demolished here last night, when hit by a Southern railway train. Mr. Lyon was bringing two new automobiles over land from Detroit to Harrodsburg. He was squarely in the middle of the track when hit. He was removed to a private residence, where his recovery is expected.—Harrodsburg, dispatch to Louisville Times.

All Columbia was sorry to hear of this accident, and trust that its seriousness will not keep Mr. Lyon from his business many days.

## Long Time Ago.

In 1831-2 the gentleman who owned the residence, now the property of Miss Jennie Garnett, had a well put down, that is he started to sink a well, in the meadow, almost opposite where a bottling plant stood a few years ago. The drilling had progressed only about six feet when salt water was struck. The hole was plugged with a walnut pin, about 4 inches in diameter, and the dirt shoveled back into the hole. This occurrence was soon forgotten, but in 1885 one of our oldest citizens, John T. Barbee, referred to it, and as the oil excitement was running high here at that time, it was suggested that the plug should be found, and an investigation made. At this time W. S. Turpen owned the property, and he at once employed fifteen or twenty hands with horses, plows and spades, and after plowing and spading for a week the plug was found, and upon pulling it out water in profusion commenced to pour out. It had a salty taste, and it was concluded that there was no oil deeper down, and the hole was again plugged, and the ground leveled.

Who knows but oil or a paying salt well is in this section.

## Public Sale.

On Saturday, 31st day of August, 1918, I will offer to the highest and best bidder, at the Sam Ed Squires farm, about three miles west of Columbia, near Greensburg and Columbia road, the following property:

40 head of hogs, various sizes; 20 head of cattle, including three cows and calves; 5 head of horses and mules; 10 head of sheep. Also 50 bushels of wheat; 30 or 40 bushels of old corn, about 15 acres of new corn; about 4 acres of new tobacco, 10 thousand lbs of hay, 1 good man's saddle, one buggy and harness. This property will be sold on twelve month's time. This sale is brought about by my having to go to war. Will Ed Squires. Sale to begin at 10 a. m., promptly. J. S. Breeding, Auctioneer.

## Pardoned.

Rollin Stephens, who was convicted at the May term of the Adair circuit court, upon a seduction charge, and given three years in the penitentiary has been pardoned by Gov. Stanley. Mr. S. H. Mitchell went to Frankfort last week with the petition, signed by nine of the jurors to whom Stephens was tried before, and the Governor ordered his pardon, issued. Mr. Mitchell brought young Stephens home and he is now on his father's farm.

## Eloped.

One day last week Ernest Thomas, son of Tandy Thomas, and Miss Martha Jones, daughter of Mr. and Mrs. W. H. Jones, of the Glenfork section, eloped to Tennessee where they were married. Upon their return all was forgiven and the couple are now at the home of the bride's parents.

## Red Cross Sale.

We are authorized by the Columbia Red Cross Ladies that there will be sold at auction on the square, Monday, Sept., 2nd, a very handsome quilt and other articles for the benefit of the National Red Cross fund.

## Strayed.

A yearling Steer, black muley, left my place near Fairplay, about June 1st. Will pay for information in regard to same.

C. C. Lewis.

## Wanted.

Hickory and White oak spokes 2 1/2 x 2 1/2 twenty-nine inches. \$30.00 per m. Adair Spoke Co.

## Fertilizer.

Get your fertilizer at Stevenson's Garage on Monday, Wednesday and Saturday of each week 42-3t A. B. Corbin.

The Radcliffe Chautauqua has come and gone and it was a good one. Dr. Culp's lectures on the war the first afternoon and evening, abounded in interest and were delivered in a most captivating manner. There are but few better speakers, and it is not often you hear a more cultivated speaking. His subject appealed to the audiences and he was lustily cheered.

One firm in Adair county has refused to obey the instructions of the local Food Administrator in regard to the distribution of sugar. As a result of this disobedience the firm will not be allowed to handle any sugar during the month of September, and perhaps longer.

Rev. L. F. Piercy closed a very interesting meeting at Clear Spring last Wednesday night. A great deal of interest was manifested and the church greatly revived. There were four additions. Mr. Joseph Crawley, of Cumberland county, conducted the song service.

## For Sale.

Big Type Polan China pigs, four months old. 44-2t Bascom Dohoney.

Meeting at Union under care of Rev. Watson grows in interest. Large crowds morning and evening last Sunday. Meeting every night this week at 8 o'clock. All day meeting next Sunday with dinner on the ground. Next Saturday afternoon all interested parties are requested to meet at the cemetery and clean off the grounds.

Read the ads in to-day's paper about "My Four Years in Germany." It is a Paramount picture, and the most interesting one now on the screen. It will be here the 11th of September. No one should miss it, afternoon and night.

## Church Membership in the United States Shows Large Increase in Ten Years

During the ten-year period ending December 31, 1916, the total church membership in the United States increased from 35,068,058 to 42,044,374, or 19.9 per cent; the number of churches from 212,230 to 223,007, or 7.4 per cent; the number of ministers from 164,830 to 191,722, or 16.3 per cent; the number of Sunday school scholars from 15,337,811 to 20,569,831, or 7.8 per cent, and the number of Sunday school officers and teachers from 1,746,074 to 2,049,293, or 17.4 per cent.

These data, developed by the census bureau's recent inquiry relating to religious bodies, are contained in a statement compiled under the supervision of William C. Hunt, chief statistician for population.

The number of denominations covered was 201, an increase of 13 over the number reported for 1906. This increase is the net result of the consolidation or dropping out of 16 small denominations and the addition of 29 small denominations, comprising some in existence in 1906, but not then brought to light, and others resulting from consolidation of formerly independent churches.

Of the 42,044,374 church members reported, 15,742,262, or 37.4 per cent, were Roman Catholics; 250,340, or six-tenths of 1 per cent, were adherents of the eastern orthodox churches (mainly Greek and Russian), 359,998, or nine-tenths of 1 per cent, were members of Jewish congregations.

The remainder, 25,631,774, or 61.1 per cent, comprised the membership of the various Protestant churches, together with that of a few bodies, such as the Latter Day Saints, the Spiritualists and others not usually considered as belonging to any of the groups named.

In comparing the figures, given it should be borne in mind that the Roman Catholic and eastern orthodox churches include in their membership all children who have been baptized, whereas the Protestant churches do not, as a rule, receive young children as members, and that in the case of some of the more orthodox Jewish organizations only the male incorporators or those who have bought shares or memberships are treated as members.

The foregoing percentages, therefore, overstate the relative strength of the Roman Catholic and eastern orthodox churches and understate that of the Jews.

## Mother's Cook Book

The surest road to health, say what they will, is never to suppose we shall be ill. Most of these evils we poor mortals know. From doctors and imagination grow.

## Missouri Hoe Cake.

Put through a sieve two cupfuls of cornmeal, and a half a teaspoonful each of baking powder and salt. Add one tablespoonful of melted fat and stir in water to make a soft dough. Make into small cakes a half inch thick and bake on a hot greased griddle until well browned on both sides.

## Barley Popovers.

Beat two eggs, one cupful of barley flour, one teaspoonful of sugar, half a teaspoonful of salt and one cupful of milk; use a Dover egg beater and beat until smooth. Bake about 40 minutes in a hot, well-greased iron pan. One-fourth of a cupful of rice flour may replace a half cupful of barley flour, improving the recipe some.

## Cheese and Rice Souffle.

Put one and one-half cupfuls of American cheese through the food chopper, stir into it one and one-half cupfuls of white sauce, season highly with paprika, and when the cheese is melted add one and one-half cupfuls of cooked rice and the beaten yolks of three eggs. Fold in the whites of the eggs and turn into a well-greased baking dish, set in hot water and bake half an hour in a moderate oven.

## Liberty Ice Cream.

Add one and one-half cupfuls of evaporated milk to one cupful of water and two cupfuls of milk, then scald. Add one cupful of honey and cool. When cool add one cupful of crushed raspberries and a teaspoonful of lemon extract. Freeze as usual.

Can apples, apple juice and other fruit juice without sugar. In the winter the apple juice may be heated and sweetened, and it will be as good as if sweetened when put up. This takes no sugar now when it is scarce. A jar of fruit, perfectly sterile, will keep fully as well unsweetened.

Dry corn. This is difficult to keep when canned, but it dries easily and keeps its flavor. Cook five minutes, just long enough to set the milk. Cut and dry as quickly as possible.

Dampen the brush of the carpet sweeper before using; it will then take up all lint with the dust.

Nellie Maxwell

## Fastest Battle Cruiser.

The largest and fastest battle cruiser in the world is being built by the United States. It will have 180,000-horse power and a speed of 35 knots.

## Concrete Motor Boat Is Speedy

Prototype of the Newest of the Freight-Carrying Vessels Built to Defeat the U-Boats

A Close-Up of a Concrete Motor Boat, Which May Be the Coming Type of Pleasure Craft.

The stone age—in boats, at least—has returned to Washington. Floating easily on the waters of the Potomac there is today the first real stone boat the capital has ever seen. It is the Concrete, a prototype, as its name implies, of the newest of the freight-carrying vessels built to defeat the U-boats.

This little motor boat, in its first trials there, more than proved the boasts of its builders as to its seaworthiness. The hull is only three-quarters of an inch thick, but, driven by a ten-horse-power engine, the Concrete developed good speed in several trips and drew favorable comment from several officials who rode in it.

## Stars of Gold

Bands to be Worn on Arm by Those Who Have Lost Near Relatives in War.

War department officials who have been consulted in regard to the black band with gold stars to be worn on the left arm by those who have lost relatives in the war recommended that the gold star of the navy, fifteen-sixteenths of an inch in size, which may be purchased at any army or navy equipment store, be applied by hand on a band of broadcloth or other suitable material. The use of the regulation broadcloth is not obligatory, however, and the insignia may be made at home.

The band is to be of black, three inches wide, the stars, one for each member of the family lost, to be of gold, of gilded metal, satin, or of cloth, or may be embroidered in yellow silk or gold thread. The badge will not be patented and will not be commercialized.

The badge was devised by the woman's committee of the Council of National Defense and approved by President Wilson.

## To the Point

Man was originally made to serve his maker, but along came woman—and the servant question has been unsettled ever since.

The man who admits that he doesn't know at least has the advantage of the other fellow who had to go through the school of experience to find out that he didn't know.

Most of the mothers not only send their sons to the war but wish they could go along with them.

Success very seldom comes to the fellow who refuses to do something for which he is afraid the other chap will get the credit.

## War Strength of Company In U. S. Army Is 250 Men

The war strength of a company in the United States army is six officers and 250 men. The war strength of a regiment is 103 officers and 3,652 men, made up as follows: Twelve rifle companies, one headquarters and headquarters company, one supply company, one machine gun company, one medical detachment. A battalion consists of headquarters, four companies and machine gun section.

## Drafted Men's Insurance.

A drafted man in the army is not compelled to take out insurance, but he is urged to do so. The minimum amount of insurance that can be taken is \$500, and the insurance ranges in multiples of \$500 up to \$10,000, which is the maximum. The insurance of a married man can be made payable to his father and mother, but the allotment of his pay must be made to his wife.

## Graduated in America.

About 30 per cent of Norway's dentists are graduates of American dental colleges or have taken post-graduate courses in the United States.

## Marked Variation in Yield Of Income and Profits for Different States This Year

Wide variation in the yield of income and excess profits taxes in different states this year, as compared with income tax payments last year, was shown by tabulations of the internal revenue bureau at Washington. Eight times as much revenue was received from these sources this year as last in the entire country, the comparative figures being \$2,821,000,000 and \$359,000,000, yet the increases by states ranged from 2.6 times for Idaho, Utah and Montana to 15 times for Mississippi, Alabama and West Virginia. New York state ranked first in the volume of income and excess profits taxes returned this year, yet the increase over last year's yield was only 5.13 times.

Tax officials, it is said, have found it impossible to draw definite conclusions concerning tax evasions from the tabulations.

Increases by other states were as follows:

South Carolina, 132.3 times; Kentucky, 13; Arkansas and Oregon, 12 each; Illinois, Ohio, North Carolina and Pennsylvania, 11 each; Louisiana, 10½; Nebraska, Tennessee and Wisconsin, 10 each; Maine, Vermont and New Hampshire (jointly), 9.7; Georgia, Kansas and Minnesota, 9 each; Virginia, 8.8; Missouri, 8½; Washington, 8.4; Wyoming, Colorado and Indiana, 6.13; Massachusetts, 5.15; Connecticut and Rhode Island (jointly), Iowa and North and South Dakota, 5; California, 7½; Florida, 7.13; Michigan, 7; New Jersey, 6.23; Delaware, Maryland and District of Columbia (jointly) and New Mexico and Arizona (jointly), 6½ each; Texas, 4½; Oklahoma, 2.7.

## How to Distinguish Branch Of Service by Colors Worn

The branch of service to which soldiers belong may be told by their hat cords. The key to the military color scheme follows:

Blue—Infantry.  
Red—Artillery.  
Yellow—Cavalry.  
Red and white—Engineering corps.  
Pink and white—Signal corps.  
Blue with red tassels—Machine gun corps.

Green—Service corps.  
Orange—Quartermaster's corps.  
Plum and black—Medical corps.  
Dark red and black—Ordnance corps.  
White band without cord—Aviation training corps.

Blue and white—Reserve militia and volunteer training corps.

Regular army men are to be distinguished by the plain U. S. on their collars, while members of the National Guard have a small N. G. after the U. S., and members of the National army a small N. A.

## Some Speed.

A rifle bullet covers about two miles in five seconds, while sound travels the same distance in a shade more than nine and one-half seconds, so it is easy to understand why the bullet strikes before the report of the rifle is heard.

## Seiners Make Rich Haul.

It is said that a boat with five fishermen went out seining from Orrs Island, Maine, for herring recently and received \$500 for their day's work, sharing \$100 each.

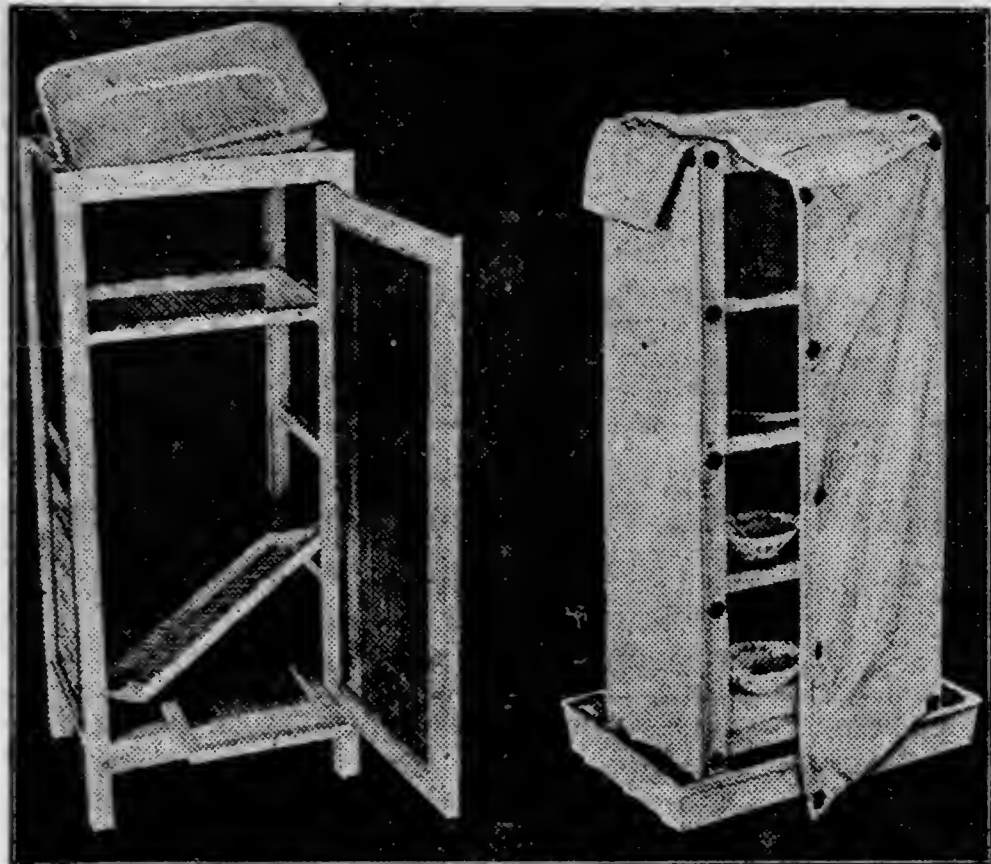

## Home-Made Iceless Refrigerators

Food Can Be Kept Cool in This Inexpensive and Easily Constructed Convenience

Where ice is not obtainable an iceless refrigerator, homemade, will be a useful food keeper and food saver. Maintaining a low temperature through the evaporation of water from its canvas cover, according to the United States department of agriculture, the iceless refrigerator will keep meats, fruits and vegetables cool and will extend the period for keeping milk and butter. It can also serve as a cooler for drinking water. This is the way to make it:

A wooden frame is made with dimensions 42 by 16 by 14 inches and covered with screen wire, preferably the rustless type, which costs little more than the ordinary kind. The door is made to fit closely, and is mounted on brass hinges, and can be fastened with a wooden latch. The bottom is fitted with a pan, but the top should be covered with screen wire. Adjustable shelves can be made of solid wood or strips, or sheets of galvanized metal. Shelves made of poultry netting on light wooden frames, as shown in the illustration, are probably the most desirable. These shelves rest on side braces placed at desired intervals. A bread-baking pan, 14 by 16 inches, is placed on the top and the frame rests in a 17 by 18 inch pan.

All the woodwork, the shelves and the pans should receive two coats of white paint and one or two coats of white enamel. This makes a very attractive

Two Views of Homemade Iceless Refrigerator. View on Left Shows Frame. View on Right Shows Complete Refrigerator.

surface and one that can be easily kept clean. The screen wire also may receive the coats of enamel, which will prevent it from rusting.

A cover of cotton flannel, burlap, or duck is made to fit the frame. Put the smooth side out if cotton flannel is used. It will require about three yards of material. This cover is buttoned around the top of the frame and down the side on which the door is not hinged, using buggy hooks and eyes or large-headed tacks and eyelets worked in the material. On the front side arrange the hooks on the top of the door instead of on the frame and also fasten the cover down the latch side of the door, allowing a wide hem of the material to envelop the place where the door closes. The door can then be opened without unbuttoning the cover. The bottom of the cover should extend down into the lower pan. Four double strips, which taper to eight or ten inches in width, are sewed to the upper part of the cover. These strips form wicks that dip over into the upper pan.

The dimensions given make a refrigerator of very convenient size for household use and one with efficient evaporating surface, but it is not necessary to follow strictly these dimensions. If a larger capacity is desired, the height of the refrigerator can be increased.

In homes where large quantities of milk and butter are to be kept it would be well to have one refrigerator for milk and butter and another for other foods, as milk and butter easily absorb odors from other foods. It costs very little to build the refrigerator and nothing to operate it. The operation is as simple as the construction. The upper pan should be kept filled with water. The water is drawn by capillary attraction through the wicks and saturates the cover. As evaporation takes place, heat is taken from the inside of the refrigerator, thereby lowering the temperature of the inside and the contents. Capillary action starts more readily if the cover is first dampened by dipping it in water or throwing water upon it. The greater the rate of evaporation the lower the temperature which can be assured; therefore the refrigerator works best when rapid evaporation takes place.

When the refrigerator is placed in a shady place in a strong breeze and the air is warm and dry, evaporation takes place continuously and rapidly and the temperature inside the refrigerator is reduced. Under ideal conditions the temperature has been known to be reduced to 50 degrees Fahr. When it is damp and the air is full of moisture, the refrigerator will not work as well, since there is not enough evaporation. More water will find its way to the lower pan, but it will be drawn up into the covering by capillary attraction when the air again becomes drier.

The refrigerator should be regularly cleaned and sunned. If the framework, shelves and pans are white enameled they can be more easily kept in a sanitary condition. It is well to have two covers, so that a fresh one can be used each week and the soiled one washed and sunned.

## Traumatic Shock, Harvard Medical Expert Finds Far Most Deadly in Trenches

Men rarely die of shell shock but they have been dying at the rate of 20,000 a year in the English and French armies alone as a result of a far more deadly form of shock—traumatic shock, says the Atlantic Monthly. In fact, the latter is usually fatal when skilled assistance is not at hand. Dr. William T. Porter of the Harvard medical school has been sent into the front line trenches in France to study this strange enemy in action. Traumatic shock, he found, usually follows a serious fracture of a major bone like the hip bone or multiple wounds through the subcutaneous fat layer.

By experimenting with injecting olive oil into the veins of a cat Dr. Porter developed symptoms identical with those appearing in cases of traumatic shock, confirming his belief that fatty globules are released into the veins by certain wounds and these gradually clog up the hairlike capillaries of the brain until circulation ceases. Then began an interesting series of experiments in the front line trenches in which Dr. Porter tried the experiment of giving carbon dioxide to freshly wounded men to prevent shock. The patients were delighted with his tests and crowded around eagerly to watch the operation.

All of these details, together with many keen and humorous reactions of a trained observer in the war zone, are set down in Dr. Porter's recently published little book, "Shock at the Front." In fact, one well known critic insists that the book, far from being a mere medical treatise, is rather "a glimpse of the war done in sharp stroke by a physician who has as pretty a technique with the pen as with the scalpel."

## Keeping Books Aids Farmer in Ascertaining What Part of Living Comes From Farm

(By the United States Department of Agriculture.) How many people know just what it costs them to live? Such information is extremely valuable, especially if the makeup of the cost is known, both as to money cost and the other factors. To the farmer such data should prove valuable, indeed, especially in determining what part of his living comes from the farm.

If the accounts have been completely kept, the household expenses are easily assembled from the cash record, inventory and record of supplies used. Nothing in the realm of figures is more likely to astonish the average farm family than a summary of the household costs. The farm furnishes the family a house to live in, milk, butter, cream, eggs, pork, fowls, fuel, vegetables and fruit, and often a great many other things. Yet the farmer often does not think of all these unless they are set before him. If he breaks even on the year he is likely to think there is no profit in the business when, in fact, he may have been living much better than the average city business man of like education, attainments and capital.

All these things may have to be seen to be believed, but a well-kept set of records, by adequate handling, can be made to show them.

## SMILES FOR ALL

Not a Thing.  
"The youngsters think they're smart with their new dances."  
"Well, Uncle Josh?"  
"I'll admit they do give you a good excuse for hugging a girl, but at that they ain't got nothing on the old-fashioned kissing games."

The Jury Understood.  
"I fear I went too strong on that talk about it wasn't money we were suing for, but the principle of the thing."  
"Why so?"  
"The jury saw it in that light, evidently. Gave us eight cents damages."

Heels Vs. Heads.  
"I suppose she's head over heels in love?"  
"I think it is a case of heels over head this time. She is engaged to a tango fiend."

Not Hindering It.  
"Cholly, why don't you let your mustache grow?"  
"Why don't I let it? Good heavens, dear boy, I do; but it won't."

Too Considerate.  
"That's a fine stenographer you have."  
"Yes," replied Mr. Camrox. "But she's too deferential. I never pretended to be any great scholar, and sometimes she flatters me to the extent of trying to imitate my style of spelling."

Of Counsel.  
Kidd—What caused Gaybird to fly the coop?  
Kidd—Chickens.

## Letters from a Soldier.

The following are copies of letters written by a soldier boy in France to his mother at Mannsville, Ky.

Somewhere in France,  
July 1, 1918.

Mrs. Lizzie McDermott,  
Dear mother:—

I will try and write you this afternoon. I am well and hope this will find you all the same. Well, mother, I am in the front lines now, and have been for a week or so. I feel fine and it is not so bad as you hear it is. Well, Mamma you know I never liked the thought of war, but I have been drilling awful, awful hard and carrying some heavy packs on my back and I said that if ever I got a chance at a German, I would make him pay for this hard work, and I feel pretty proud of myself, as I was the first one in Co., H. and the first one in the Reg. to cause a German to go into dreamland. On June 26, at 4:30 in the morning, I was on Post No. 1, on listen Post. I saw a German coming up on the top of his trench. I was only seventy yards away, so I leveled on him and he signed up his checks. The Captain offered \$5.00 for the first one to get a Boche, so I was the lucky one. So you can tell all the people at Mannsville, that I have made one shot on the firing line and got me one. I think I was lucky to be the first one out of twenty-five or thirty thousand to get a Boche. So don't worry about me, I will be out on a rest in a week or so. Has Hascal or Charlie gone to camp yet or not. I haven't heard from you or Hascal or anyone yet, since I crossed over. Well, mother it is awful cold here in the place where I am. It snowed here on June 22. I have seen those big shells burst a mile away. We are living in dugouts and have to have a candle to see. Well mother I will close, answer soon, as I want to hear from you all. With love to you all, from your son,

J. F. McDermott,  
Co. H., 138 Inf. A. E. F., via N. Y.

Dear Mother:—  
I will try to write you a few lines this afternoon. Well, mother, I will try to tell you about our raid last night. Co. H., went over the top into No Man's Land, into the Germans second line trenches and captured prisoners and I don't know how many were killed. I think the Artillery was sure the devil on the German trenches. When we went over the top we were facing machine guns, shooting 300 times a minute. I can't see how we passed through it, but we would just run and fall into big shell holes and then get up and run again through hand-grenades. We all tore our trousers almost off and got a new pair this afternoon. They say it was the most daring raid that was ever pulled off in this section. We didn't lose but few of our men. All got barb wire scratches, as it was scattered all over No Man's Land. It was luck we started it last night, as the prisoners said they were going to attack us this morning, early, so we beat them to it, and we were glad we started first. All of the officers sure gave us some praise this morning. We got one machine gun, a new

## COMMISSIONER'S SALE.

ADAIR CIRCUIT COURT

OF KENTUCKY.

H. K. Taylor Statutory Gdn, of

Dallas Stotts Plaintiff,

vs

Dallas Stotts Defendant,

By virtue of a Judgment and Order of Sale of Adair Circuit Court, rendered at the July Term, thereof, 1918, in the above cause, I shall proceed to offer for sale at the Court-house door in Columbia, Ky., to the highest bidder, at Public Auction, on Monday the second day of Sept. 1909 at one o'clock p. m. or thereabout (being County Court,) upon a credit of six months

the following described property, to-wit:

Two certain tracts of land lying in Adair County, Ky., on the the waters of Petits Fork Creek. The first tract, contains about 73 1/2 acres and is known as the W. L. Stotts farm, and lies on the Columbia and Burksville road about 4 1/2 miles South West of Columbia, adjoins the Josiah Hunter Land and the Jack Stotts Land. The second tract contains about 15 acres, this tract is in timber and has been used to furnish wood for the first tract. It is in what is known as the flat woods section and about one and one half miles from the first tract.

For more complete description reference is made to the Judgment, pleadings and order of sale.

I will first offer the two tracts separately, and then as a whole, and will accept the bid or bids that brings most money. For the purchase price, the purchaser with approved surety or securities, must execute Bond, bearing legal interest from the day of sale until paid and having the force and effect of a Judgment. Bidders will be prepared to comply promptly with these terms.

W. A. Coffey Master Commissioner

## For Weak Women

In use for over 40 years! Thousands of voluntary letters from women, telling of the good Cardui has done them. This is the best proof of the value of Cardui. It proves that Cardui is a good medicine for women.

There are no harmful or habit-forming drugs in Cardui. It is composed only of mild, medicinal ingredients, with no bad after-effects.

TAKE

## CARDUI

The Woman's Tonic

You can rely on Cardui. Surely it will do for you what it has done for so many thousands of other women! It should help. "I was taken sick, seemed to be . . ." writes Mrs. Mary E. Veste, of Madison Heights, Va. "I got down so weak, could hardly walk . . . just staggered around. . . I read of Cardui, and after taking one bottle, or before taking quite all, I felt much better. I took 3 or 4 bottles at that time, and was able to do my work. I take it in the spring when run-down. I had no appetite, and I commenced eating. It is the best tonic I ever saw." Try Cardui.

ADVERTISE IN THE NEWS

## Adair County News

Published On Wednesdays.  
At Columbia, Kentucky.

BARKSDALE HAMLETT, Editor.

Democratic newspaper devoted to the interest  
of the City of Columbia and the people of  
the adjoining counties.

Entered at the Columbia Post-office as second  
mail matter.

SUBSCRIPTION PRICE \$1.50 PER YEAR IN ADVANCE

WED. AUG. 28, 1918.

By a vote of 336 to 2 the new Man Power Bill extending the draft ages to all men between 18 and 45 years was passed Saturday night by the House. The measure now goes to the Senate.

## WAR NEWS.

Paris, Aug. 22.—The allied armies have taken more than 100,000 prisoners since July 18, says Marcel Hutin in the Echo de Paris.

Paris, Aug. 22.—The allies have damaged six German armies since July 15, and the British are now eating into the seventh, with the spread of the battle northward and over a front of seventy miles. Whether the enemy is prepared or unprepared, allied efforts have had the same results and the Germans have been out-generaled and outfought. The armies attacked and damaged in the past six weeks have been those of Generals von Elern, von Mudra, von Boehn, von Eben, von Hutler and von Der Marwitz.

The full designs of Marshal Foch are known only to himself and perhaps one or two others, but it is believed generally that his aim is not, as the Germans claim, to pierce their line, but to strike a succession of blows to close the enemy's irreplaceable losses in men and material, and to force him to make more or less disastrous retreats. If that be the Marshal's plan he is pursuing it with skill and unvarying success.

General Ludendorff is being forced to expend his effectives out of all proportion to his resources on a given sector of the front, after which another blow is struck home on another sector.

At no place have the Germans apparently been strong enough to check the attack entirely.

Wednesday the German resistance was most desperate on the right of General Mangin's army in the neighborhood of Bleuxy. If the French are able to reach the neighboring village of Juvigny, the salient marked by the villages of Juvigny, Osly and Pasly would become untenable for General von Eben, who would be obliged to retreat beyond the Soissons-Coucy-Le-Chateau road.

The German situation there is unenviable enough at present, but would become still worse as the French progressed. The Germans also would have to abandon the Vesle-Aisne line and go back to the Chemin des Dames.

Military observers who are of an optimistic turn of mind are convinced that the Germans will end their defense by falling back to the old Hindenburg line all along the front at no very distant date. While that may be so, the enemy shows no signs at present of doing so voluntarily, and is fighting stubbornly and skillfully, yielding only when outmaneuvered and outfought.

## GERMANS IN BAD FLIGHT.

Never has the situation of the Germans been so serious as at present, which augurs well for the future, says L'Homme Libre, in discussing the results of Wednesday's fighting.

The Germans have been deprived of all hopes of making a lasting stand on their present front, and the allied offensive is costing them dearly, the Figaro says. The battle is no longer a German battle, declares Le Matin, but the battle of Marshal Foch, to whose will all events appear to be subject.

The occupation of Lassigny by the army of General Humbert, newspaper commentators believe, will facilitate the capture of Noyon, toward which the armies of Generals Mangin and Humbert are pressing steadily. Lassigny was one of the pivots of the German defense system between the Oise and the Somme, and was defended most stubbornly.

Observers here see a new danger for the enemy in the British attack north of the Aisne in the direction of Bapaume. The British already are on the battle-ground of 1916.

Paris, Aug. 22.—German troops were forced back over a twenty-mile front to a depth of from one to two miles from Lassigny to the Ailette river during the night, according to the official statement issued at the War Office today.

Four villages, Le Plemont, Thiescourt, Cannectancourt and Ville, were occupied by the French, who have reached the Divette river, the statement says.

The French have reached the Oise on a six-mile front east of Noyon, their line extending from Sempigny to Bretigny.

Further east the villages of Bourguignon and St. Paul-Aux-Bois have been taken. The French reached the Ailette river at La Quincy-Batse. The Western outskirts of Pommiers, on the Aisne west of Soissons have also been taken.

French troops maintained contact with retreating enemy between Matz and the Oise and east of the Oise during the night.

With The British Armies in France, Aug. 23 (by A. P.) British troops this morning are reported to have captured Chuignolles and Herieville, south of the Somme River. More than a thousand prisoners were taken in this operation, which eliminates the bend in the line.

Field Marshal Haig's forces also are reported to have taken Boyelles and Boiry Bescquerelle and to be still pushing forward. They are piling up prisoners and guns.

The British have reached

Gomicourt, which is considered to be the chief point of the German defense positions.

South of Gomicourt the British this morning were attacking and pushing forward all along the line.

A battle has developed which seems to be one of the greatest of the war.

The town of Maault, southeast of Albert, fell early in the British drive. The British troops pressing on here are crossing the Bray-Albert road.

Happy Valley, to the north of Bray, was taken by Field Marshal Haig's troops after hard fighting.

Three German battalion headquarters have been taken in the locality of Happy Valley. Additional guns also have fallen into the hands of the British.

A number of fresh new German divisions have been identified.

## Hatcher.

The recent rains have encouraged the farmers, but they came too late, to materially help the corn crop. Tobacco is growing, and indications point to about one-half of a crop of this weed.

The storm near the railroad crossing this side of Campbells-ville, did thousand of dollars worth of damage. Mr. Joe Willock lost eight acres of tobacco, which he valued at nearly \$4,000. No insurance.

While returning from Cincinnati with a Ford car, Mr. Robert Lyon happened to an almost serious accident on a crossing of the Southern road, at Harrodsburg, Thursday night. He was on the track when an incoming train struck his machine, completely demolishing it. He was considerably bruised, but we are glad to state is on to his job again, at his place of business.

Mrs. Jones, mother of G. L. Jones, our stockman here is seriously sick at her home, and very little hope is entertained as to her recovery. She is 68 years of age, and is one of the most energetic and respected ladies of this community. Nothing in the way of a task seemed too difficult for her, and her expected passing will be a severe loss to her numerous admirers.

Mrs. Mollie Gaines has been critically ill at her home on Meadow Creek, for a few days. The symptoms of her sickness indicates ptomaine poisoning. At present she is showing slight improvement.

Born, to the wife of J. E. Settles, on the 20th, a fine boy. He is entertaining the whole family at present, and the proud mother and father are receiving the compliments of the ladies of the neighborhood.

There are a dearth of teachers in the R. C. A., for the present in its faculty, but indications are that all of the departments will be supplied before the incoming term.

The Taylor County High School is short of the second principal, but efforts are being made to supply the vacancy. These are live educational institutions, and it stands in hand to the public in general to give them the deserving patronage.

The Boy Scouts took a five days outing on Green river, this week. On account of labor con-

ditions not more than fifteen of the boys could afford to lose the time.

Stock hogs are not meeting as ready sale as a few weeks ago. Quite a number of the farmers are anxious to dispose of their surplus stock in order to meet food exigencies.

The usual wheat acreage will be sown, if the land can be prepared. As a usual thing a good wheat yield follows a short corn crop.

Fertilizers in quantities are being bought and also inquiries are being made for select seed.

26 more of our young men left for Camp Taylor, Monday. Our soldier boys have learned the necessity of finishing the task before them, and but very few protests are offered by them in going forth to fight for justice.

The camp meeting at Acton is being well attended, and Dr. Wimberly, of Louisville, is preaching some forceful sermons to appreciative congregations.

## Rugby.

We are very dry here, Corn is firing up and if we don't have a rain in a few days we will not make a half crop of corn. People are cutting their burley tobacco to save it. Pastures drying up and wells and springs going dry that never was known before.

A few of our boys had to register last Saturday and in a few days a lot more will have to register.

Your scribe was in Columbia Saturday.

Mr. and Mrs. Clowins Fields and his sister Dora, of Bowling Green, were visiting at the home of his parents Mr. and Mrs. Miller Fields last week.

Mr. and Mrs. Willis Bragg, of Barren county, visited their parents here last week.

We are working our roads and trimming out our fence corners and our community is looking one hundred per cent better.

## Knifley.

Mr. and Mrs. B. F. Thomas visited at the latter's brother's John Arnold, one day last week.

Several from this place attended the Camp meeting at Acton, last Saturday and Sunday. All reported a nice time.

School is progressing nicely at Plum Point under the management of Miss Odester Burress.

Mr. Boothie Hovious has bought a new one seated automobile, consideration unknown.

Rev. Julius Robinson who has been conducting a series of meetings at Parkers Chapel, closed last Wednesday night with several additions to the church.

Died on the 21st of August, Pearl, the wife of Sam Pike. The interment was at the Carmel Grave yard.

Miss Ella Humphress spent several days of last week with relatives at Casey Creek.

Mr. and Mrs. Thad Sanders spent last Sunday at their uncles Mr. Trvine Abell's.

Mr. Willie Feese and family spent last Sunday with Mr. Jim Watson and family.

Miss Irene Humphress of Cane Valley visited Miss Hazel Knifley last Saturday night and Sunday.

There was a large crowd at-

## Local News

HAPPIEST WOMAN IN HENDERSON  
IS MRS. JNO. STULL.WRITES THIS MOTHERLY WOMAN IF  
UNHAPPY, DESPONDENT, DIS-  
COURAGED OR WEARY.

If you have had to subsist on toast and water for years, cheer up! If five physicians have done their utmost and with every patient care tried to relieve you, and through the will of Fate, failed, cheer up! If your nights are sleepless, cheer up! Pull yourself together for we must lick the Kaiser, and we don't stand as near as good a show of doing the job neatly and with despatch if you are not at your best.

## Wonderful Story.

"For one whole year I couldn't sit up. For more than two years my whole nervous system was shattered to the extent that a loud rap on any of our doors would send me almost into hysterics. Most of my time I would spend in terrible vomiting spells in an effort to get rid of the little toast I subsisted on day in, day out, week in, week out. Oh, the days were dreadfully long, the nights still more so.

"You might know that a woman as sick as I was couldn't take an interest in her home. It just seemed to be home in name only, only the loving care of my devoted husband kept sufficient life in me to live day by day. How willingly he paid out hundreds of dollars to give me just a little relief!

"Indu is going to fix you, up, little wife," said Mr. Stull. "Indu is going to give you strength," telephoned my daughter from Owensboro.

"And Indu has put me where I am today, all ready to go out and select my spring suit. Next will come my garden. Just send people around to me. My words will be stronger in Indu's praises than you can express through print. And I will tell these people of scores of my very personal friends and relatives who praise Indu just as enthusiastically as I do, as my husband does and as my daughter does."

For sale by Dr. J. N. Page.

Adv.

News of the death of Mr. D. H. Butler, which occurred in Louisville Monday afternoon, reaches us as we go to press.

Mr. J. B. Cave, who lives near Cane Valley, while in town a few days ago, stated that in his immediate neighborhood there had been but little rain since last May, but that corn was looking surprisingly well.

A few days ago twins were born to Mrs. P. K. Jones, who lives in the Knifley section. One was born dead and the other lived but a few minutes after birth.

D. E. Phelps was on the Louisville market last week with two car loads of stock. He sold his hogs at from \$17.30 to \$19.75; his cattle at from 6 to 10 cents. Sheep brought from \$3 to 16.75.

E. S. Rice and Ray W. Page, purchased, a few days ago, Tom Atchley's threshing machine and every thing that goes with it, for \$2,200. This machine is known to be a good one.

The town Board has had Burkesville street greatly improved. Metal was put on then rolled by the machine, making a smooth and very substantial piece of work.

Geo. B. Cheatham, of Milltown, delivered 140 hogs last Wednesday to Dink Durham, of Campbellsville, at 18 cents.

Smith Gill, this place, is now a second Lieutenant, receiving his promotion last week. He is now at Camp Mills, New York.

All the teachers for the two institutions of learning will arrive this week. The call to books will be next Monday.

## A Trip to Texas.

Gradyville, Aug. 21st, '18.

Editor News:—

If you will allow me a little space in the paper, I will give its many readers a little sketch of my trip to Texas, and the many sights I saw in that section of country. On July the 11th my wife and I motored to Campbellsville in my car and at 3 p. m., we were on board the train on our way to the Lone Star State. Changed cars at Lebanon and at Lebanon Junction, and the next morning, Friday, at 7:30 a. m., we were in Memphis, Tenn., a city of 146,113 population, and at 8:15 we were on board a through train for Texas, via Pine Bluff, Ark. From Pine Bluff to Texarkana, a beautiful little city on the Arkansas and Texas line, with a population of 17,835 and the next city of any note was Tyler, Texas, with 17,250 population, and the next city was Corsicana, a beautiful little city with 17,550 people. From Tyler to Corsicana, a distance of 70 miles, the crops were fine and cotton was waist high, the best I saw in Texas. Corn was good and peaches, oh my, the finest ones I have ever seen. There was plenty of them on the train after we made the first stop in territory, and the first porter, who came through the train selling them, I just bought a market basket full and then took my seat by the side of my old gal and I was so busy I didn't see any more Texas soil until I heard the bell ringing and the porter calling Waco, change cars for McGregor, and in less time than I can tell it, we were out and had arms around our loved ones, dear brother, his wife and son, who were there in his Overland, to take us to their home. After a short rest we boarded his car and drove through the city, one of the nicest cities in Texas. Has a population of 45,270. We went through Camp McArthur, where there are '60,000 soldiers in training. We went from this camp to the Aviation field where we could see hundreds of airplanes. This was a grand sight to see men flying in every direction. It made me feel like I wanted to get in one and go over to Berlin and drop a bomb on the Kaiser. After viewing the camps, we started for McGregor and made the trip, 20 miles, in 30 minutes. When we arrived at our destination, it wasn't long till our friends from old Kentucky, who lived in the adjoining community began to arrive to question about the old Kentucky home and their people. The first ones to arrive, were Joe Yates and family, Frank Wheeler and family, Jas. Hoy and family, Will Sharp and family, Bob Yates and family, Cyrus Keltner and family, Topper Moore and many others. We were constantly going from place to place. Our first trip was to San Antonio, via automobile. My brother, his wife and son, Vernon, myself, my wife not being physically strong enough to make the trip.

The trip was inexplicable, for the many interesting places we saw on our way there and back. Good luck was ours, for not one bit of car trouble did we have. The roads were fine, for we made the trip, which was 227 miles in one day, stopping off at

many places of interest, namely, Austin, San Marcos and New Braunfels.

When we arrived in the beautiful city of San Antonio, we drove first to Camp Travis, where James Grady was stationed. The camp was a place of interest, on account of the many boys who were there and too, their method of drilling and working.

Our next stop was Camp Stanley, the officers' training camp, where we found Sergeant Garland Grady. This camp is superior to most other camps on account of the beautiful shade. Although water was difficult, for there were only two drinks allowed to each person in one day, and there were 5,000 cavalry horses and they had to be taken 7 miles to get water every day. The first night of our stay in the city, we gathered at one of the boarding places, and here I met Sergeant Grady's wife, formerly Miss Myrtle Butler, and Alta Grady's husband, Jack Cavitt. Then we visited the Alamo, where the decisive battle was fought between the Texans and the Mexicans. The place was wonderful to view, and the old picturesque walls were interesting to examine.

The many magnificent parks of the city were open to all visitors and one could see the boys in khaki under the beautiful shade trees, enjoying their few hours of recreation.

When good-bye was said, and we started on our route home, it was a pleasure, yet sadness held a vast area in my heart to think of our trip and what I had seen. I will now dwell long enough to tell of Texas. We found it so very dry and hot that it was very unpleasant for both my wife and I. Crops, in general, do not amount to anything, and in the surrounding country, near McGregor, there was not one bushel of corn made on a twenty acre field. Cotton looked fairly well, but without a rain, the gathering will be extremely short. There was quite a large amount of grain produced.

Water is hauled for miles, for every well is dry. Cattle and stock are suffering for lack of water. After 2 weeks' stay at McGregor, we started to Memphis, Texas, to visit my wife's brother and sister. Went via Ft. Worth, 351 miles from McGregor to Memphis. Cotton and corn is almost a total failure all the way. When we arrived at Memphis, my wife's sister and brother were there waiting for us. We went in the waiting room for a short rest and when we left there, my wife left her purse and some money and about \$44 worth of jewelry, on the seat and did not miss it until we arrived at her sisters, 4 miles, and when I went back to look for it some one had swiped it, so I reported to the R. R. agent and he wired for a detective and 2 days later, I was notified that the purse and all its contents had been found after our stay of a day at Memphis, we started for our old Kentucky home. There are many other things that I could write about this trip, but for fear this will go to the waste basket, I will lose,

Respt.,

W. L. Grady.

ADAIR COUNTY NEWS \$1.50

## PUBLIC SALE

As administrator of the estate of Mrs. Ann J. Bricken, deceased, I will offer at public auction, on the farm that is known as the home place and fronting on the Springfield and Lebanon turnpike, about 3½ miles from Lebanon and 5½ miles from Springfield, on

Tuesday, Sept. 3

Beginning at 10:30 a. m.

## Farm of 286 Acres

The farm contains by a recent survey 286 acres and 32 poles. It will be offered separately in two tracts and then as a whole, and sold in the manner it brings the most money.

Tract No. 1 contains 123 acres and 12 square poles. It has on it a house of 5 rooms, two good tobacco barns that have held 12,000 pounds of tobacco or more, and a small stock barn. A pond that has not been dry for several years, a well and springs. This farm is all cleared land. Has on it a locust grove that will make 800 or a 1,000 posts, and good fencing.

Tract No. 2 contains 163 acres and 20 square poles of good land. This tract has no buildings on it. Has about 50 acres of woodland with some valuable oak and other timber, and when cleared will grow excellent burley tobacco.

The whole of 286 acres is in a good state of cultivation and is a fine stock farm. The land is strong limestone, is fertile and well adapted to blue grass.

## Farm of 170 Acres

Another farm belonging to the estate, containing about 170 acres, near the above land but not adjoining, will be offered at the same time and place. This tract is about 3 miles from Lebanon, and about 300 yards from the Lebanon and Springfield pike. No ground on this farm has been cultivated for several years, except 7 acres for tobacco last spring. All the rest of the farm is in grass. It has on it a good barn about 39 feet square, a good pond and two wells.

Terms will be reasonable and will be made known on day of sale.

I will be pleased to show these farms to any prospective buyer.

JAMES M. BRICKEN, Admr., Lebanon, Ky.

## Roy.

The much needed rain fell here last Sunday.

Born to the wife of W. G. Mullinix August the 5th a son. Mother and babe doing nicely.

Little Miss Clara Bailey daughter of Bill Bailey has typhoid fever at this writing.

Mr. J. H. Vire and children are visiting friends and relatives in this section at this writing. They motored thru from Terre Haute, Ind., in a Ford car.

Mr. W. O. Darnell of Cartersburg, Ind., is visiting in this section.

Mrs. Mettie McElroy is very low at this writing, a victim of tuberculosis.

Mr. and Mrs. Johnnie Bryant will start to Colorado, in a short time for the benefit of the latter's health.

Miss Tina Blakey has been visiting her grandparents at Denmark for the past week.

There will be a singing at White Oak church the 1st Sunday evening in September, conducted by Profs. S. L. Williams, J. M. Tarter and R. O. Cabell. Come early and hear some good singing.

Mrs. B. O. Hurt has been on the sick list for several days.

There is a meeting in progress at Freedom conducted by Rev. Joel Bolin.

Mrs. Bannie Helm of Russell Springs, visited her sister at this place, Mrs. Bessie Conover a few days ago.

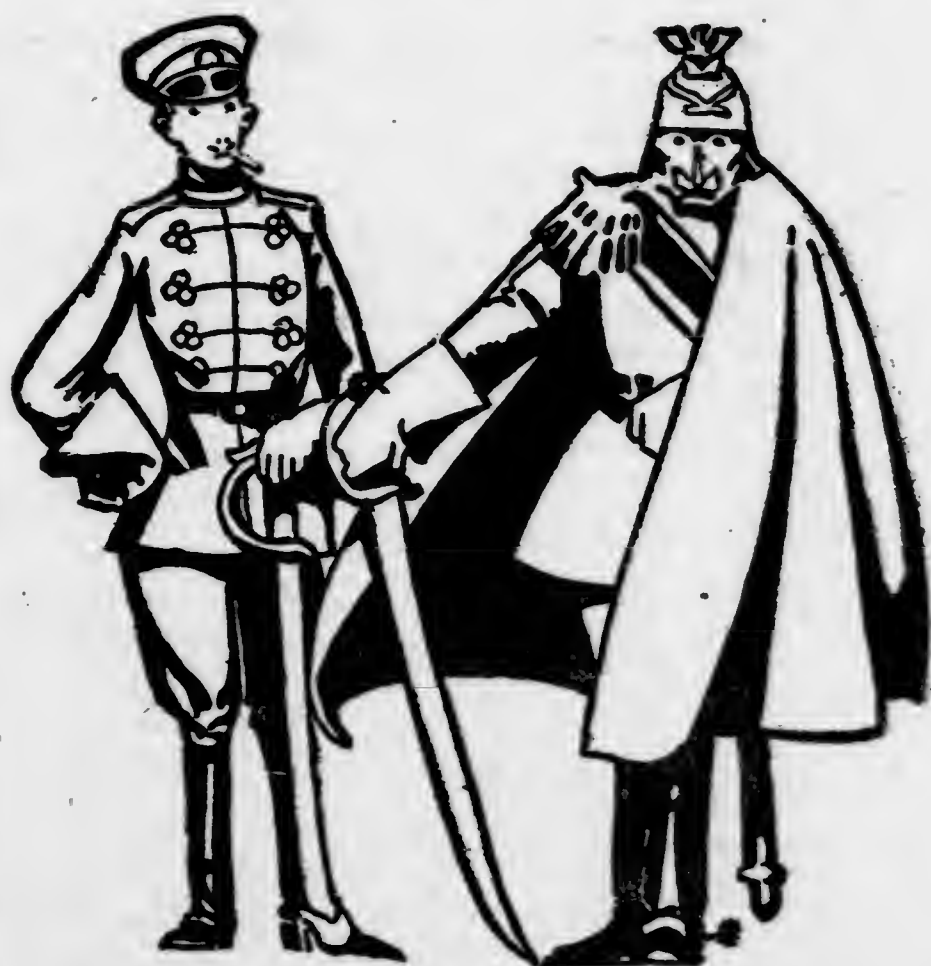

Miss Echol Calhoun who is teaching at Tarter, visited her home folks at this place a few days ago.

Mr. A. W. Popplewell and Silas Dunbar of Jamestown, spent a night with F. B. Simmons recently.

The Adair County News,

\$1.50

## "Birds of a Feather"

"If you won't fight I will" said the Crown Prince to His Father.

## A REAL BLOOD BOILER.

If you haven't yet found out why America entered the War and want this information; if you want your hair to stand on end at the atrocious crimes of the Huns; if you want to know why 100,000,000 red blooded Americans are united in the common fight against autocracy; if you want to know much of the inside "dope" on the Prussian deviltry and diplomatic cunning; if you want to know these things, which are facts, pure and simple—then you had better see the great film version of JAMES W. GERARD'S famous expose, "MY FOUR YEARS IN GERMANY," which will be shown September 11th., at PARAMOUNT THEATRE.

This picture will make your blood boil; it will fill you with righteous indignation. It will make you thing of the part that you should be playing in in the big SCRAP, it will put the characteristic American "fight" in a fellow—well it puts so much into a man who sees it that it can't be described.

The feelings must be experienced before they can be appreciated. It's the solemn duty of every American in ADAIR COUNTY to see this truly remarkable Picture SEPTEMBER 11th, 1918, at PARAMOUNT THEATRE.

## Finds Million Are Consumptive

National Tuberculosis Association Asks for Plans for  
Cheaper Hospital Buildings

Need for increase of hospital facilities to accommodate tuberculous persons, said to number more than a million in the United States, is asserted in a statement issued by the National Tuberculosis association. The statement says in part:

"It was recently reported that the capital issues committee would probably not approve anything except the most inexpensive temporary structures. The association feared it might mean the holding up for the duration of the war of any increase in hospital accommodations.

"Something more than a million persons are now suffering from this disease in the United States, and the previous shortage in accommodations has been rendered more acute by the problem of providing proper care for men rejected in the draft.

"We have gone into the question with the capital issues committee and find that the attitude of its members is one of open-mindedness. The committee does not pass upon building projects which do not require the issuance of bonds, or those which can be covered by capital issues not exceeding \$100,000. Permanent structures may be approved if the difference in cost is not too large.

"Plans and estimates as to the most economical types of permanent buildings and of practicable temporary structures have been requested, to submit to the capital issues committee.

### Jim Vaughn Has a Varied Assortment of Curves and Is Puzzling Hard Hitters

"Is Vaughn as great a pitcher as Alexander?" Bill Killefer, who ought to know a great deal about it, says "Yes." Bill was the battery mate of Alex the Great. He also has officiated behind the plate donning the mask and spangles when Hippo is on the hill.

Batsmen would rather see almost anyone on the firing line than Vaughn.

Jim Vaughn.

The branny southpaw of Mitchell's staff has averaged about five strikeouts a game this season. "Alexander is a wonderful pitcher," said Killefer recently. "So is Vaughn. I've handled them both and, take it from me, there's little to choose between the pair. Vaughn is the equal of Alexander, all things considered, but their styles are different. Alex is a side-arm pitcher. Vaughn has a varied assortment of curves and he has a great hook that is puzzling to batsmen."

### Bones of Napoleon's Heroes Paid Homage by French Poilus

An interesting ceremony was held recently at Rivoli, in the province of Verona, Italy. There, on January 14, 1797, Bonaparte won a great victory largely through the skillful use of his artillery. So it was only natural that in 1918 the French expeditionary force in Italy should choose the battlefield of Rivoli for its artillery training school. When the ground was being prepared for this purpose the bones of eight soldiers of Bonaparte's army were discovered and identified by their buttons as grenadiers of the guard. Their remains were solemnly interred at the foot of the monument of the battle of Rivoli, a detachment of French poilus rendering the last homage to their predecessors of 121 years ago.

### Around the World

New Hampshire will teach only English in public schools. Philadelphia factories are ready to employ crippled soldiers.

Peru has 300,000 residents of Japanese and Chinese half-blood. Pennsylvania reports serious shortage of teachers for rural schools.

An anarchist organization in Saratov, Russia, has passed a decree making all women from seventeen to thirty-two years of age community property.

### Cherry Tree, 84 Years, Bearing.

Planted when Gen. U. S. Grant was a lieutenant stationed at Fort Vancouver, a cherry tree on the farm of Grant Farmer on Ford's Prairie, Wash., is still bearing at the age of eighty-four years. It has a spread of 65 feet and its trunk measures 10 feet 11 inches in circumference.

Experiments have shown that good water can be made of grapevins.

## A WATCH IN THE NIGHT

"Watchman, what of the night?"  
"Rumors clash from the towers;  
The clocks strike different hours;  
The vases point different ways.  
Through darkness leftward and right  
Voices quaver and boom,  
Pealing our victor's praise,  
Tolling the tocsin of doom."

"Optimist, what of the night?"  
"Night is over and gone;  
See how the dawn marches on,  
Triumphing, over the hills.  
Armies of foemen in flight  
Scatter dismay and despair,  
Wild is the terror that fills  
War-lords that crouch in their lair."

"Pessimist, what of the night?"  
"Blackness that walls us about;  
That it is the star has gone out,  
Whelmed in the wrath of the storm.  
Exhaustless, resistless in might,  
The enemy faints not nor falls;  
Thundering, swarm upon swarm,  
He sweeps like a flood through the vales."

"Pacifist, what of the night?"  
"We hear the thunder afar,  
But all is still where we are;  
Good and evil are friends,  
Here in the passionless height  
War and morality cease,  
And the moon with the midnight blends  
In perennial twilight of peace."

"Soldier, what of the night?"  
"Vainly, ye question of me;  
I know not, I hear not nor see;  
The voice of the prophet is dumb;  
Here in the heart of the fight  
I count of the course of their way;  
I know not when morning shall come;  
Enough that I work for the day."  
—London Punch.

## FOR THE POULTRY GROWER

"Aspergillosis" is the name of a disease that is fatal to chickens, and is the result of feeding moldy grain, writes Frank L. Pratt, extension poultry husbandman, United States department of agriculture.

It is especially important that the farmers and poultry keepers should protect their chickens by giving them as sound and sweet corn as possible.

There is practically no cure for this disease. As the disease develops there is a fever, diarrhea, drooping wings, great depression, suffocation and death. The symptoms are similar to those of tuberculosis, and aspergillosis and tuberculosis are both cases of what practical poultrymen often term, "going light."

The spores of aspergillosis are usually introduced by moldy grain or feeding the grain in moldy litters of straw. The fungus most frequently develops in the respiratory system, mouth and lungs. To prevent it, feed sound, sweet grain. Moldy corn is particularly dangerous.

## Selection of the Stars in the Flag of United States

Whatever conclusions may be reached as to the originator of the idea of selecting stars to represent the states of the federal union, one thing is certain; and that is that the stars which adorn the American flag were never borrowed from the coat of arms of any American citizen, not excepting that of George Washington. In the first place, General Washington who, as some authorities think, owned the stars selected for the purpose, was far from being the "father of his country" in the early part of 1777, when the Star-Spangled Banner came into being. At that time the military situation of the country was at its lowest ebb, and Washington was beset by more than one cabal of jealous rivals. No, our forefathers who formed this glorious union looked higher than man for a symbol of sovereignty, and sought the heavens, which "declare the glory of God," for a sign, and selected something from the firmament, which "showeth His handiwork;" or there would have been no "In God We Trust" on our coins today.—Admiral Chester in Yale Review.

## Two-Year-Old Tot Can Read, Count and Tell Time of Day

A tiny two-year-old baby girl in California holds the world's record in mental development. The infant prodigy is Martha Springer, twenty-six months old, daughter of Mr. and Mrs. John E. Springer of Mountain View. The child can read like an eight-year-old, according to a correspondent. The father says the child has a normal mind, which simply has been developed by persistent training. At a recent meeting of college professors and experts in pedagogy and psychology the child for 40 minutes read, counted and told the time by clock and talked with the men who were observing her. Her baby brain did not sag, and she appeared to enjoy the long interview. All were unanimous in declaring that the baby's case indicates that geniuses are made, not born. The child reads and speaks with a vocabulary of about 2,000 words. She is large for her age and eats and sleeps well.

## Can With Corn Sirup, Says Department of Agriculture

Corn sirup may be used in canning and in making jellies, jams and marmalades and fruit butters. Varying amounts of corn sirup are used with sugar. The sirup gives a modified flavor to products so it should be tried out in small quantities at first to suit the family taste. It combines most satisfactorily with strong flavored fruits such as pineapple and cherries. The amount used must be determined by the kind of fruit and the strength of the sirup.

## Signs Forbidding Peasants From Taking Potatoes, Plan To Induce Eating of Tubers

Although potatoes were early introduced into Europe by the Spaniards, they did not come in quantity for many years. The English found them in Virginia, but it is believed that the Spaniards brought them to that colony from further south.

The first attempt to introduce them into France was due to a well-known scientific authority named Parmentier. This was in the seventeenth century, says Popular Science Monthly. He imported some of the plants, set them out in a field near Paris, and by means of learned pamphlets and talk with the people tried to have the new vegetable brought into cultivation and the market.

But it was all in vain. Potatoes did not prove attractive, and when the planted ones matured it seemed that they would rot in the ground on account of the prejudice against them.

Then some wise man who knew human nature—a student of psychology, with practical ideas—suggested that peasants could not be made to try potatoes by persuasion, but might be led to adopt them if they were forbidden to eat them.

His idea was adopted. Many signs were painted and erected in plain sight, forbidding under severe penalties anyone from taking any potatoes from the field.

The peasants at once began to raid the hills, and before long most of the ripe tubers were stolen and eaten with relish.

## Automatic Soldier Made Of Steel Shoots 400 Shots In Any Desired Direction

"An automatic soldier" is one of the latest developments in weapons of war. A Danish engineer has recently taken out a patent for an apparatus to which he has given this name. It consists of a steel cylinder normally within a larger cylinder, the whole being sunk into the ground vertically. By means of a mechanism operated by wireless, the inner cylinder rises to a height of 18 inches from the ground and simultaneously an automatic rifle mounted on the inner cylinders fires 400 shots in any given direction.

The "automatic soldiers" can be controlled from a central position some four or five miles behind the line of defense, according to the inventor. They may be seen by the enemy only when they rise from the ground.

From trials already made it has been shown, so it is reported, that a few hundreds of these steel soldiers can easily defend a position against infantry attacks, however numerous the opposing force may be. They blaze away their 400 shots without flinching, and never retreat. In order to overcome the "automatics" they must be destroyed one by one.

## SMILES FOR ALL

### To and For.

"Everything I have in this world I owe to my wife."  
"I'm almost like you, too. Everything I owe for in this world my wife bought."

### Giving Details.

"Kitty married a man a good deal older than she is, so I hear."  
"Older! Why he's twice her real age and three times the age she says she is."

### Numbers.

"I always look out for number one," remarked the egotistical man.  
"Friend," replied Mr. Chuggins, "if that's the only number you look out for in these days of traffic confusion you're liable to get run over and never know who did it."

### Very Necessary.

A rotund gentleman with a perennial smile had to have his daily joke as he meandered into his club.

"I have here the most valuable motorcar accessory ever invented," he remarked.

"What is it?" asked a tall, thin gentleman.  
"A bankbook," replied the first speaker.

### Cause and Effect.

"That famous financier has such an angular countenance."  
"No wonder; he made himself by corners."

### Easily Arranged.

"How are we going to get any quotations out of these press notices?" asked the theater's advertising man.  
"The most generous of them says, 'This is not a very good show.'"  
"Well," replied the manager, "for billboard purposes you'll have to condense it a little."

### How?

"Just leave out the word 'not.'"  
Such is Love.  
"Too bad about Jack and the girl he's engaged to. Neither of them is good enough for the other."  
"Where did you get that idea?"  
"I've been talking the matter over with both families."

## SKETCHES OF ADAIR COUNTY.

Historical and Biographical that  
Will be of Interest to all  
Readers of the News.

BY JUDGE H. C. BAKER.

No. 30.

In November, 1892, the Columbia Milling Company was organized, its incorporators, Geo. J. Reed, W. B. Rowe, Z. M. Staples, W. W. Bradshaw, and W. W. Jones. The stock was subscribed by a number of the citizens of Columbia, and the building near the bridge, this side of Russell Creek, was erected. George Nell was the manager. After a few years the stock fell into private hands, and the business is now owned and controlled by a private company.

The organization of this Milling Company was the beginning of the improvement which has come to Columbia in the addition to the town along Russell Creek, consisting of dwellings, mills electric plant, etc., and, although it brought in individual to its promoters it has added greatly to the growth and prosperity of the town, illustrating how the starting of one enterprise may lead to others.

The introduction of commercial fertilizer, sometime after the close of the civil war, worked quite an improvement in our farming interest and methods. Its use was very gradual, and at first in very limited quantities. Dr. Samuel B. Field is entitled to the credit of its introduction, and it came about in this way. He was at the time tobacco weigher at Louisville. At the time an office authorized by law, and I was editing the Spectator, at Columbia. He wrote me that his friends, Wm. Skeene & Co., were manufacturing a fertilizer—superphosphate, bone meal, &c., and they wished to introduce it in the county, and asked me if I would insert an advertisement in the paper, and take my pay in the fertilizer. Having space to spare, as was usual with the paper at that time, I agreed to do so, and several sacks of their products were shipped to me. Personally I had no use for it, as I had nothing but a garden, and I did not know what effect it might have on the soil or vegetables—thought possibly it might taint or poison the whole outfit, so, I requested the farmers to come in and get small quantities and try it in a few hills of corn, tobacco, and other crops. They did this, taking it away in paper sacks, oyster cans &c. No one cared to venture more than a gallon on a field, and very few that much. They were willing to try a few hills, but they did not care to risk too much.

The experiments resulted favorably. The doctored hills outgrew the others, were healthier and more vigorous, and it was but a little while until the farmer who had commenced with a pint was using a ton.

It was along about this time when the first Jersey cows were brought into the county, and a little earlier the first male of that family. He was placed in charge of Matthew Taylor, an enterprising citizen of the Greenville neighborhood. This animal met an ignominious death at the hands of some disaffected persons in that locality who were not friendly to Jersey bulls. Mr. Taylor, one morning found him

dead with his head under a rail fence well weighed down. An effort at one time was made to introduce the barbed wire fence in the county, but it met with as little favor as the animal named above. There has been a prejudice to its use except in a modified form. This may be due in part to a remark made by Wm. Stewart, Esq., upon his inspection of the first one built in the county.

After giving it a critical examination, he said; "Well, it may keep the stock inside from getting out, and the stock outside from getting in, but my judgment is that the wires can never be put close enough together to keep the man out of his who would build such a fence."

Following this the man took the fence down, and no one has used it since except as a top wire, or in connection with woven wire or plank. Possibly Stewart's remarks may be regarded as prophetic.

The contract to build the present courthouse in Columbia was let at the July term of court, 1884. The contractors were Wm. H. Hudson, of Columbia, and Columbus Stone, of Burkesville, Ky. The contract price was \$17,486. John Eubank, James G. Conover, and W. U. Chelf, composed the building committee. The house was accepted by an order made at the May term, 1887. When the bills were footed up at the close, they amounted, including contract price, incidentals, etc., to the sum of \$31,230 37. The clock, which was not included in the contract, cost several hundred dollars. A change in the location, after quite an amount of work had been done on the foundation, entailed a loss of several hundred dollars. The house is a handsome building, well constructed, and convenient and comfortable in its arrangement.

Judge A. E. Sallee was county court Judge when it was built. He served in that position for twenty years, and had he lived, it is probable he would have continued in the position for an indefinitely longer time, as he had ways that made him very popular with the masses. Although he was not an old man when he died, he was familiarly known as "Old Jack," a name which was given him by some of his comrades of the town. The name stuck to him to his death. He was never married.

Pickwick did not have a more benevolent countenance, nor a warmer heart than Judge Sallee, and, with it all, he was not without a sense of humor. While he never married himself, he occasionally tied the knot for others. In the discharge of his official duties, and in doing so imposed obligations that were very specific and strict on the contracting parties. On one occasion, it was in substance as follows:

"Well, John, you and Betsey wish to get married, do you? Hold up your hands and be sworn. John, do you love Betsey? Do you promise to be good to Betsey, and to take good care of her? Do you promise to keep her supplied with a plenty of dry wood and kindling while she does the cooking, and do you

# REASONABLE PRICES

and Repairs, at Reasonable Prices.

## A Full Stock of Wagons, All Sizes, Prices Reasonable

We'll say in regard to above that Reasonable Prices  
in our Judgment can not be offered very long even  
by ourselves. Will be glad to quote to any of our  
friends at at time, and still gladder to sell you.

We have Wire and Wire Fence quite a full stock for these war times  
Prices Reasonable.

And our Clothing and Shoe stock is a wonder for the times. We have "Old  
Fashion" Wool Clothes at Old Fashion Prices. Nifty Styles for Boys and Sen-  
sible Genteel Styles for Men Folks.

Ginghams and Calicos in the Dry Goods Lines at prices that will please our  
Lady friends. Also a nice stock of Summer Goods: Voils, Lawns  
and the Whole Family.

## WOODSON LEWIS, Greensburg, Ky.

promise to get up in the mornings and kindle the fire and bring the water from the spring, and otherwise demean yourself as a good husband?

Betsey, do you love John? Do you promise to continue to love him, and to do the cooking, and keep John's socks darned and his pants mended and otherwise demean yourself as a good wife should? All right, you two are married now, and you can go on home."

At the time of the building of the new court house, there was quite an anti-court house sentiment upon the part of some of the tax payers of the county. An order had been made for the building, but it was drawn in somewhat vague terms and a lawyer had been employed by some of the "antis" to try and have the order rescinded, the parties thinking, if they could get clear of the order, they might be able to block the enterprise and prevent further action in the direction.

Quite a discussion arose before the court of claims, presided over by Judge Sallee, and towards evening, as the discussion progressed, feeling grew quite warm as is often the case when a question of taxation is involved.

Judge Sallee was the last speaker, and while he talked, he remained seated. He reviewed the action which had been taken by the court, and urged the members of the court to stand to their first order, insisting that if it was not sufficiently comprehensive, it could be made so without undoing what had already been done. Rising to his feet, and holding a stick in his hand, which

he brought down on the desk in front of him, he exclaimed with all the vehemence he could command; "We have made an order to build a court house, and we intend to build it according to the plans as agreed upon." The members of the Fiscal court sustained him, the discussion ended and a quietus was put upon the opposition.

To be continued next week.

### Dr. Williams Passes Away.

The death of Dr. Loren E. Williams yesterday morning at 4:35 o'clock, is deeply regretted by all.

He was born at Montpelier, in Adair county, in 1875, the son of Rev. Z. T. Williams, and Mrs. Williams, who was a Miss Wheat, one of Adair's oldest families. His death followed a lingering illness of Bright's disease, which involved a general complication.

Twenty-one years ago he graduated from the Louisville College of Dentistry, and then came to Glasgow, where he has resided ever since in the continuance of his dental practice. In 1906 he was married to Miss Minnie Depp, daughter of Mr. and Mrs. J. P. Depp, of this place, who survives, with two lovely little children.

The city never had a native or adopted citizen more popular than Dr. Williams. For many estimable reasons he was a man of immense popularity. He was what he was at all times and in all things. In the social side of life, in the business world, and in the many phases that go to make up the human life he was every inch a man. His great sincerity was guided by his deep, conscientious spirit and his as-

pirations to be genuine in all things.

Those who knew him best will substantiate the fact that his humblest and poorest patient received his best known workmanship, his undivided interest and the same gentle, courteous and affable treatment that the richest man received. Dr. Williams was an exemplary type of citizen ship and a greatly beloved man. Kind, benevolent, courteous and reserved to a certain extent, his lovable personality always drew and held the affection and admiration of all. To every good and worthy cause he was a liberal contributor, and always stood for those things that represented the betterment of the town and the community. He was an ideal husband and father.

Aside from his very great usefulness, as a man he was a lover of music and possessed a beautiful tenor voice of appealing and sympathetic qualities. Ever since he had been in Glasgow he had been one of the leaders in the choir at the Christian church, of which he was a devout and consecrated member. His reputation as a gifted singer far exceeded local bounds as he had often been the soloist in many church conventions out in the state. His church relationship was a glowing example of just what the kindredship between a man and his church should be. He was a member of the Board of Deacons and was a leading and active member of the Christian church.

Surviving are his wife and two children, Jane Armstrong Williams and Loren E. Williams, Jr. Also his father, Elder Z. T. Williams, of Columbia, survives, as well as the following brothers and sisters: Elder Lawrence Williams, Texas; Mr. Luther Williams, Cave City; Mr. Joe Williams, Columbia; Mrs. Bert Epperson, Columbia; Mrs. Kirby Smith, Jamestown, Tenn., all of whom attended the funeral and burial except Elder Lawrence Williams, who was called home from here a few days ago.

Brief funeral services will be conducted at the Christian church this morning at ten o'clock by Rev. E. W. Elliott. The burial will be in the Glasgow cemetery.

In the death of Dr. Loren E. Williams the town loses one of its leading and skilled professional men. Truly a good and noble man, an honorable man and influential citizen, and a prince among men has gone to his eternal reward.

Peace to his ashes!—Glasgow Times, at time of death

### Resolutions.

The following Resolutions were adopted recently by the Metcalfe county Colored Teachers Institute.

We your committee on Resolutions of the Metcalfe Co., colored Teachers Institute respectfully submit the following:

Whereas, having been in the town of Edmonton for the past week, and sharing the hospitality of the citizens, therefore we turn to them our heartfelt thanks for their cordiality and respect shown us while in their midst.

Whereas, having embodied great good, and rendered enthusiasm from having been here, we resolve, to return our several districts, with renewed vigor, to do more for the raising of the educational Standard of the colored Schools and Youth of Metcalfe Co.

Be it resolved that we return a vote of thanks to Mrs. A. E. Murphy for the noble and efficient manner in which she did the clerical work of the Institute.

Be it further resolved, that we turn a vote of thanks to Prof. R. Lasley for the high and efficient manner in which he instructed this Institute.

Be it still further resolved, that we extend a vote of thanks to Prof. R. A. Palmore, our Co., Superintendent for the manner in which he conducted our Institute.

Respectfully Submitted.  
Your Com. } R. B. Smith Chir.  
} Miss Ora Wood,  
} Miss Emma Clark.

### Sensations of an Airplane Man Detailed as to Thrills Experienced at Dizzy Height

The trials for my military brevet were for the most interesting thing I have done in aviation. On finishing the 60-horse power Blériot class, I was told that I would have to do my brevet work on a small Caudron biplane, as there were no Blériots available, writes Nordhoff in Atlantic Monthly.

Off she went with a roar, all ten cylinders firing perfectly, so I motioned the mechanic to pull out the blocks from before the wheels. A quick rush and a turn headed me into the wind, and the next moment the starter's arm shot forward.

Old 2887 is a bully bus. I was off the ground and heading up in forty yards. It was rather an occasion for a beginner who had never before flown over 2,500 feet. The little Caudrons, of course, are not high-powered, but she climbed splendidly. In ten minutes I was circling over the camps at 3,800 feet and in twenty I had reached 6,000, just under the roof of the clouds. There was only one blue hole through, so up this funnel I climbed in decreasing circles, till I finally burst out into the gorgeous upper sunlight.

At 8,000 feet I began to float about in a world of utter celestial loneliness—dazzling pure sun, like the water of a coral atoll, and beneath me a billowy sea of clouds, stretching away to infinity. Here and there, from the cloudy prairies great fantastic mountain ranges reared themselves; foot hills and long divides, vast snowy peaks, impalpable sisters of Orizaba or Chimborazo, and deep gorges, ever snowing, widening or deepening, across whose shadowy depths drove ribbons of thin gray mist.

Once, as I was sailing over a broad canyon, I saw far off to the south a dark moving dot and knew with a sudden thrill that another man like myself, astride his gaunt buzzing bird, was exploring and marveling at this upper dream world.

### New Seed Oils Will Supply Valuable Food, Tests Made By Government Have Proved

In experiments to determine the digestibility of oils made from corn, soy beans, sunflower seeds, Japanese mustard seed, rape seed, and charlock seed—oils not now commonly in use—the United States department of agriculture found that they are well assimilated, and in value compare favorably with other vegetable oils.

These digestion experiments, reported in Bulletin 687 published by the department, are a part of the series which is being conducted by the department to determine the digestibility of various foods. During the test period (three days) in which the oils referred to constituted practically the entire sources of fat, the subjects ate on an average of 58 to 90 grams per day, and did not report any ill effects. To judge by their digestibility these oils, according to the bulletin, should prove satisfactory sources of fat for the dietary.

### IT IS TO LAUGH

#### Getting the Expression.

"Will you take something to drink?" asked the photographer.  
"With pleasure," the sitter replied.  
The photograph was taken and the sitter said:  
"But what about the little invitation?"  
"Oh, that's just a professional ruse of mine to give a natural, interested expression to the face."

#### In All Sincerity.

"I made a bad break just now."  
"How so?"  
"I told Miss Passer I'd ask her to dance, only there wasn't room on the floor to swing a cat!"

#### A Hot One.

Mrs. A.—You were such a charming debutante, my dear, five years ago.  
Miss B.—Was I? I only remember you made such a lovely chaperone for me when I came out.

#### Just Like People.

"Microbes are not all of one kind."  
"No, indeed; there are romantic microbes that live in kisses, and mercenary microbes that live on dollar bills."

#### Strayed Away.

Advertisement  
—Lost while going home to Brookline, black leather handbag. You cannot always trust a black leather handbag to go straight home every night.

#### A Bad Start.

Bride—I'm so afraid people will find out that we're just married, that I've made Jack promise to treat me in public just as if he had no thought of anyone but himself.

Mrs. Longwed—My dear, I adopted that plan when I was married, and my husband never got over it.

#### Personal.

He—The fools are not all dead yet.  
She—That's as sure as you live.

### POULTRY KEEPING IN BACK YARDS

Poultry keeping, although a comparatively simple undertaking, will be successful in direct proportion to the study and labor which are expended upon it. There is an abundance of good material on the subject, but Backyard Poultry Keeping (Farmers' Bulletin 889), a publication of the United States department of agriculture, contains all the general directions needed to make a start. It tells how to overcome the objections to keeping poultry in the city, what kinds of fowls to keep, the size of the flock computed according to the size of the back yard, gives definite instructions as to the best kinds of chicken houses to build, with bill of materials for same, directions as to feeding the fowls, hatching and raising chicks, prevention of diseases and many other matters essential to the success of the undertaking. Another helpful bulletin of a general character is Hints to Poultry Raisers (Farmers' Bulletin 528). This gives a great deal of useful and authoritative information within a very small compass.

### 47,500,000 Acres of Wheat Should Be Sown This Fall For 1919 Liberty Harvest

A great liberty wheat harvest in 1919 is asked of American farmers in a national growing program issued by Secretary Houston after full consideration of the increasing needs for this essential food at home and in the allied nations.

Not less than 45,000,000 acres of winter wheat is called for in this fall's sowing and Secretary Houston suggests that approximately 47,500,000 acres could be sown if conditions are especially favorable. The larger acreage, it was pointed out, would better meet the estimated needs of the allied nations and the population at home.

From the minimum acreage called for, which is only about the average of the five years 1913-17, it is estimated 636,000,000 bushels of winter wheat might be expected; from the suggested larger acreage, approximately 697,000,000 bushels should be harvested. These production estimates are based upon an average yield of 15.7 bushels an acre and an abandonment of 10 per cent in the area sown on account of winter kill.

### Mother's Cook Book

The grandest of heroic deeds are those which are performed within four walls and in domestic privacy.

To be able to have things we want, that is riches; to be able to do without, that is power.—George McDonald.

#### Food for the Family.

Skim milk may be used in countless dishes where whole milk was formerly considered indispensable.

#### Milk Soups.

Take one quart of skim milk, one-fourth of a cupful of meat fat or oleomargarine, one-fourth of a cupful of flour, two teaspoonfuls of salt. Melt the fat and stir it into the flour; when well mixed add the cold milk and cook until the flour is well cooked, stirring constantly. This thickened milk may be used as a foundation for any cream soup. Add two cupfuls of corn, peas, beans, or potato pulp. In using tomato, add a fourth of a teaspoonful of soda. One-half cupful of grated cheese or the same amount of peanut butter will make cheese or peanut soup.

#### Peanut Loaf.

Take one cupful of toasted bread crumbs, three-fourths of a cupful of peanut butter, one-half of a cupful of rice, one teaspoonful of salt, a speck of pepper, and a teaspoonful of poultry dressing, with a tablespoonful of chopped parsley. Combine, make in a loaf and bake thirty minutes; unmold and serve with tomato catsup.

#### Nut and Cheese Loaf.

Nuts like legumes are rich in fat and protein. To aid in digestion they should be ground or chopped. Take one cupful of grated cheese, one cupful of walnut meats or hickory nut meats, one cupful of bread crumbs, two tablespoonfuls of water, one teaspoonful of salt, two tablespoonfuls of onion and a few dashes of pepper. Cook the onion in a tablespoonful of oil and water until tender, add the other ingredients and bake in a loaf until brown. Garnish with lemon points.

#### Nut Muffins.

Take one and a half cupfuls of whole wheat flour, one-half teaspoonful of soda, the same of salt, a half cupful each of molasses and sour milk, one egg and a half cupful of nuts. Mix the dry ingredients, and the ground nuts, add other ingredients, stirring enough to mix and put into greased muffin pans. Bake thirty minutes in a moderate oven.

#### Nut, Cheese, Date Salad.

Stuff eighteen dates with seasoned cream cheese. Roll in chopped nuts. Arrange three on a salad plate with a pile of mayonnaise in the center.

He—The fools are not all dead yet.  
She—That's as sure as you live.

### From Camp Meade, Md.

Dear Editor:—

Let me give the readers of the News a hint of what we boys of the Machine Gun Co., has to do.

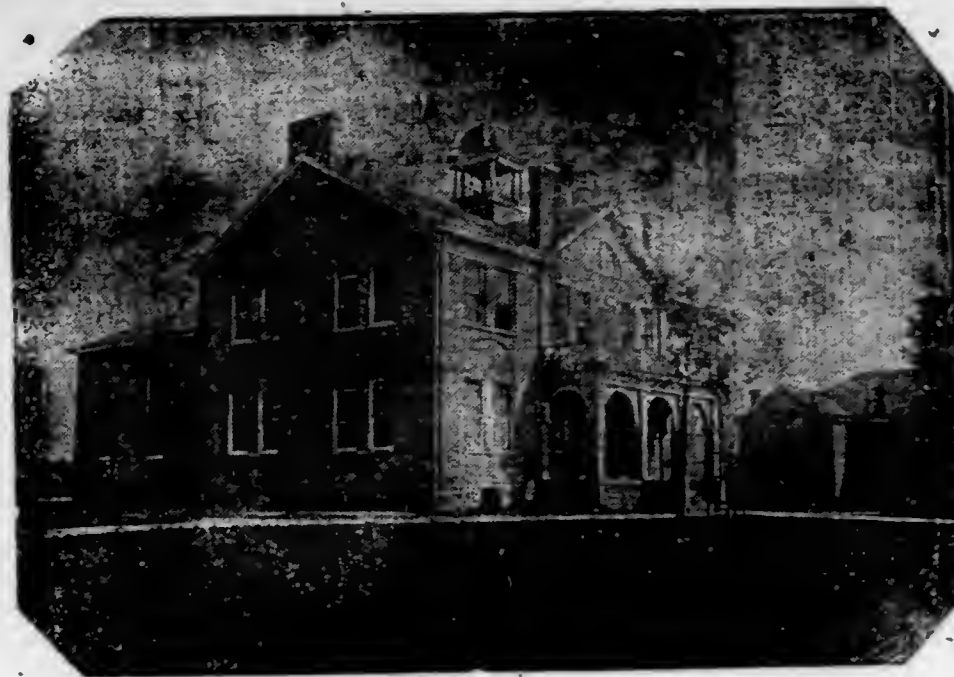

Nothing much, just get up at five thirty in the morning, stand reveille, and one platoon, (1/2 of the company) goes to the stable, water and feed the mules and horses, while the remainder of the company goes through a series of physical exercises. This makes us relish our "slum." Then the whole push is found in the bath-house washing for breakfast. After the craving appetites have been satisfied, and scrambled eggs no longer taste good, our plate, cup, knife, fork and spoon are stacked on tables, then soon each man will be found preparing his bunk, and the floor beneath it for morning inspection. Everything that resembles a match, stem, paper, cigarette, or tobacco must be polished up in and around quarters. After this, the men go to the stables again, take every horse and mule out, and here is the fun. "Grooming them." Lets not forget that everything here is done systematically. There are two ways to groom the stock. One is the right way and the other is the wrong way, and after about one correction we prefer the right way. Here it is: Each man leads his animal into the corral, ties it to the fence, and takes his stand two paces directly to the rear of the animal. This being a nerve racking position to some, knowing how easy it is for the southern extremities of some mules to come in contact with a man's "chow basket," they are not seen standing there very long. A signal from the commanders whistle places every man to the left of the animal in his charge. At the command, commence grooming, every man falls in on the animals left front foot, here he toils until the next command is given, which is, "face and left neck" then the "barrell," then "left hip and leg." "Change sides, march" will be the next command, commencing at the head, this side is groomed just like the left. This is supposed to be done in twenty minutes, but the boys that groom the ill-natured animals declare they surely spent an hour on the rear feet.

Next comes bridling and saddling of the animals. This, too, is done in a certain way, which I'll not take time to discuss just now, but when this is done, we know that exercising the animals is next on program. After they have come to the end of a six or eight mile hike, some of them declare it is also pretty stiff exercise for man as well as beast, especially those whose mules can not be ridden. They just have to cling to the end of the halter shank with one hand and mop sweat with the other. After the hike is finished we just drill in company formation or by platoons or sectors or squads until noon.

Three hours drill, and stand retreat completes the afternoon work, unless we are called out to "police up" quarters, or answer "fire call" or may be go on "guard" or "clean and grease the saddles." Some may wonder when our time comes to do all our writing and thinking of the ones back home. Well, that
